

LNG Terminal Operators Course

April 26-30, 2010

Scope:

The course is intended to familiarize LNG terminal personnel with liquefied gas tanker safety and cargo operations. Terminal equipment such as pumps, hard arms, gas compressors, vaporizers, heat exchangers, and shore storage tanks will be included. Classroom training is augmented with opportunities for hands-on application using the cryogenic simulator.

Objective:

Successful completion of this course should enable students to perform specific duties and responsibilities related to those duties in connection with cargo and cargo equipment. The student will have a basic understanding of the properties and hazards of liquefied gas, cargo containment systems, terminal equipment, cargo equipment and instrumentation, safety precautions and measures, ship/shore interface and emergency procedures.
